

To Whom It May Concern-

If you are considering using Rod Jones' team for custom A/V services please accept my testimonial. He has handled numerous projects (OVER MORE THAN 10/T-E-N YEARS TIME!) for us including:

(At our home in Duluth)

outdoor sound on deck & at pool....including wireless control

"nested" TV's for viewing multiple games at once

reprogramming remotes

hung numerous new TV's....including one in rock facade over the mantle

finished theater room in basement including custom surround-sound (then he did my neighbor's basement, 6 months later!)

(In E Hall County)

wired entire farmhouse for satellite TVs & indoor/outdoor audio

established wireless control through cell phones & 1-pads

{In Tucker GA)

set up satellite TV service/hung & programmed TV's at our warehouse, for the customer's (at service counter) & the employees (break room).

When choosing any contractor my main two considerations are "timeliness & quality of work". I also prefer people who communicate well & are "responsive"...•my wife & I have referred Rod to many of our friends.

You will never be disappointed by Rod & his team....believe me, he just won't let that happen.

Sincerely-

Scott Roberts
